Parking Violation System – PVS

Al Mazroui Technologies provide integrated online solutions for parking control, using handheld devices, like PDA and send data to the financial system though GPRS instantly or store data locally on the device memory until returning to the office in the case of offline mode. In addition to the possibility to locate and follow up the work of a traffic officer through GPS (Global Positioning System) technology, the solutions have been developed locally to suit the requirements of the local market and in Arabic language.

Steps:

- 1. Access system (by an officer)
- 2. Verify vehicle plate number
- 3. Issue electronic fine
- 4. Upload fine details
- 5. Print fine ticket
